Task 1 English – Please read, highlight any unknown words and look them up in a dictionary or using ‘Word’ synonym tool. Write a definition for your highlighted words.

By now the story of this dreadful tragedy, of the nightly suffering Hrothgar and his people were enduring, had spread far and wide. They had heard about it too across the water in the land of King Hygelac of the Geats, for a long time faithful allies of the Danish kingdom. But only one of them, the greatest and bravest of all princes — Beowulf he was called — decided that this evil beast of the night must be punished for all his wrongdoing, that Heorot must be cleansed of this wickedness and Hrothgar and his people saved at last, even if Beowulf had to give his own life to achieve it. Family and friends, Edgetheow, his father, and his uncle, the good King Hygelac himself, all of them did what they could to dissuade him from this reckless, perilous mission. But all advice, all omens, only whetted Beowulf’s determination to go to Denmark and slay this monster of the night. He ordered a strong and seaworthy ship to be fitted out for the quest, and handpicked fourteen of the fiercest warriors he knew. Out of the sheltered fjord they rowed this sturdy warship, and set sail for Denmark, riding the wind-whipped waves over the sea.

Some words I suggest are:

Enduring, perilous, omens, whetted, fjord

Task 2 Handwriting

The prefix *inter* means ‘between’. Add *inter* to each word and write the new word two or three times. The first one has been done for you.

act *interact* *interact* *interact*

active

change

connect

face

lock

mission

mix

national

relate

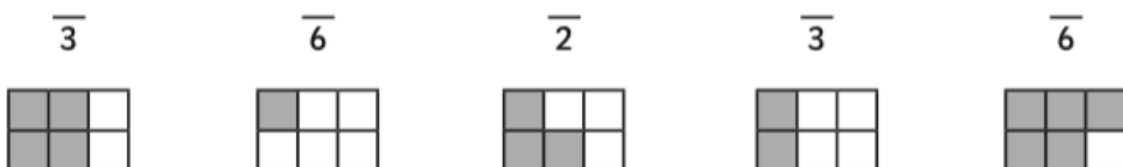

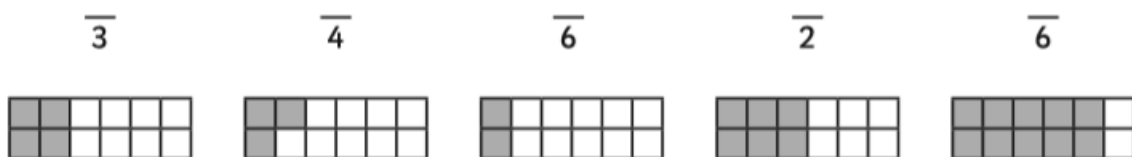

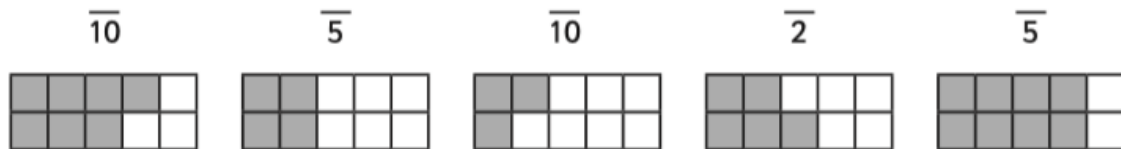

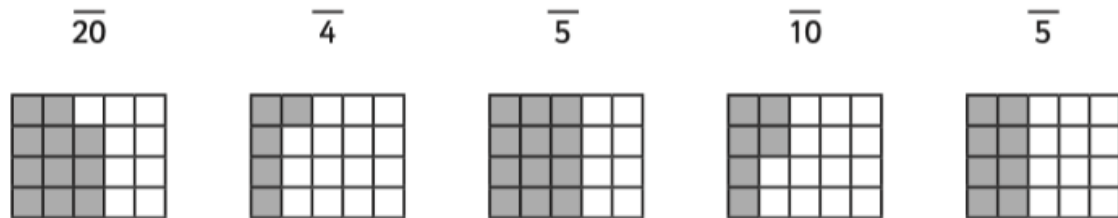

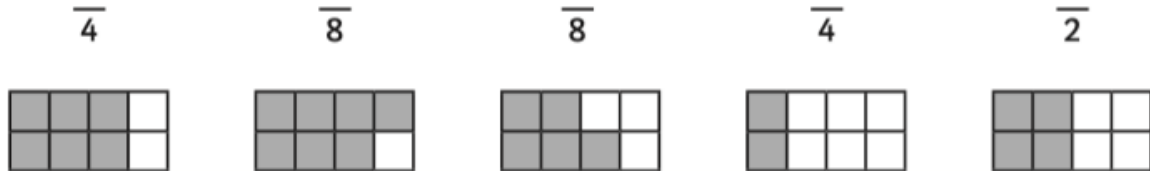

view

weave

Task 3 – Reading Either read your book, select an e-book from Oxford Owl or Bug Club and read for at least 20 minutes.

Maths

For each set of shapes made of squares, write the numerator for each equivalent fraction.

Challenge:

How many equivalents of $\frac{1}{4}$ can you find.

Computing

1. Open a word document.
2. Copy out 3 of the sentences of the Beowulf writing for English.
3. With that text you have now typed, make sure all your punctuation is correct.
4. Now change the font and the size of the text.
5. Save the document.
